

Recommended Supplies for Mr. Halderman's Physical Science Class

(1) **three-ring binder with two-inch or three-inch rings** (*This is the general notebook used for all classes that contains loose paper and folders.*)

(6) **binder dividers with tabs** (*one for each class*)

(2) **spiral-bound notebooks, one for each semester** [70 or 100 pages each, college ruled (8 ½ by 11 inches, NOT 8 by 10 ½), with plastic cover if possible, since paper covers tear] - **NOTE:** *The contents of this notebook represent a substantial portion of your child's grade. This will be referred to as the Interactive Science Notebook or ISN.*

(1) **pencil pouch** (*3-hole punched to go into the 3-ring binder works well*). *The contents of the pouch will include at least:*

(3) **functional pencils** (*no more than half used*) with erasers or a mechanical pencil with extra graphite (*a large eraser and self-contained pencil sharpener is also encouraged*)

(3) **working black or blue erasable pens** (*No other colors are acceptable in my class. Erasable pens may be used in notebooks during class lectures and reduces pencil sharpening.*)

(2) **working highlighters** (*yellow and green are preferred*)

(1) **metric ruler**

(1) **pair of scissors**

(1) **set of coloring pencils** (*very important for notebook Processing Activities – marker is NOT acceptable, because it tends to bleed through pages*)

(2+) **travel-size packages of tissue**
